

WHY EYEWITNESS SURVEILLANCE?

Eliminate Excessive and Wasted Money Spent on Guards

The expense of having one on-site security guard can easily cost thousands of dollars each month. Most guards earn a nominal amount of money. There is no special training required to become a guard. So now you have a guard left to watch over your assets, at night when no one else is around. The guard can take anything or do anything he wants, after all who is going to question the security guard? In addition, a guard can only be in one place at a time. Who knows he may be sleeping, watching TV or talking on his cell phone? What if he injures himself or worse someone else? Think about the liability of having an on-site security guard.

Liability Claims

Eliminate frivolous lawsuits. Our system stores images by date and time, making it easy to retrieve information. The information can be saved onto a CD, a storage device or emailed. All images are watermarked to preserve them for evidence.

Safety

Who is making sure your customers and employees make it safely to their vehicles? We will watch over them until they make it to their car. An escort can be arranged via cell phone with a guard who will watch while maintaining phone contact.

Internal and External Theft

Have you sat down and figured your losses over 1 year, 5 years and 10 years? Look at your losses. Stop shoplifting, vendor theft and employee theft. The likelihood of losses is dramatically reduced when an Interactive Guard is monitoring your site.

Support

You will always have our technical support desk available and ready when you need us. We maintain on call technicians 24 hours a day, 365 days a year. We never close

24/7 Security

The system provides you with a guard for your designated hours along with a record of activity at your business. Depending on activity level the system stores data for up to 90 days.

Employee Productivity

Employees work hard when being watched. If you have 10 locations you can be in any of them and watch the other locations live. The system can be set-up with two-way audio- so you can talk and listen in. So now you can see and hear what is going on at all of your other locations. This will surely keep your employees honest and more productive.

Reliability

We won't be out sick, stuck with a flat tire, on vacation or late. Eyewitness is the answer; we don't get distracted, sleep, take breaks, cause injury or get injured. Using the latest advances in technology we are able to monitor your site remotely using trained security professionals with a 99% accuracy rate.

Adapts existing CCTV System

Our system can work with most previously installed camera systems.

Retrieval

We can retrieve incidents at any time and forward them immediately to you or the designated authorities. After an incident takes place, we will retrieve and forward images of the intruder to the police department.

Storage

We offer the ability to store your data for an indefinite period of time. A liability claim can be made against your company years after the fact. The offline storage service is recommended to minimize your costs while protecting you against legal claims.

Reduce Insurance Premiums

Many insurance providers offer a discount for Interactive Monitoring. Agents understand the importance and success of this service. The insurance companies have recognized the clear distinction between a recording and an interactive guard.

Dedicated account representative

You will be assigned a representative to take care of your needs, concerns and desires. Your representative will be available to you 24 hours a day. You will be provided with direct numbers, including their cellular phone number.

CONTINUOUS RETURN ON INITIAL INVESTMENT

The system will pay for itself time and time again through increased profits and lower overhead.
